

# 2014 Annual Review

World Vision

## World Vision Myanmar

World Vision is a Christian organisation dedicated to working with children, families, and their communities worldwide to reach their full potential by tackling the causes of poverty and injustice.

### Education

Only 54 % of children complete five years of primary education. WVM prioritizes Early Childhood Care and Development for children aged 3 to 5 and creating an enabling environment for children at primary school by renovating school buildings, classrooms facilities, playgrounds, and safe water and sanitation systems. For out-of-school children aged between 8 to 18, WVM provides Non-formal education services and vocational training. These activities support WVM's global goal of increasing the number of children who can read with comprehension by the age of 11.

11,745 children attended

367 ECCD centers

754 children and youths participated in vocational training

1,897 children benefitted from life skills training

95 NFE centers

1,300 community health volunteers trained

50 sub-rural health centers and hospitals supported

134 water facilities constructed and repaired

366 latrine units supported

### Health, Nutrition & Water, Sanitation and Hygiene

Our approach to Maternal, Newborn Child Health and Nutrition (MNCHN) has a particular focus on the first 1,000 days, and identifies evidence-based, cost-effective community-based interventions for pregnant women and children aged 0-24 months. We work at the household, community, and township level to support and strengthen existing health structures. Key partners are the Ministry of Health at all levels and civil society organizations (CSOs).

### Vulnerable Children

WVM protects vulnerable children by working to eliminate abuse, neglect, exploitation and all forms of violence. We provide awareness on the dangers of trafficking and support traffic survivors with reintegration assistance. We also actively work to help identify child soldiers and assist their transition out of military service and back to their communities. To help street children, we establish Drop-in Centers and temporary shelters to provide learning, health assistance, skilled vocational training and support children to reintegrate into a safe community environment.

368 complaints on under-age military recruitment

32,981 people reached with trafficking prevention messages

54 trafficking survivors received with reintegration assistances

5,077 children and adults received awareness about Myanmar's commitment to end recruitment of child soldier

801 Street Children received services and vocational trainings

### Economic Development

To increase income through agricultural systems and development of small and medium enterprises is the ministry objective of our Economic Development program. To realize the objectives, we cover three key sectors: agricultural production, non-agricultural income, and microfinance.

95,202 farmers received Agricultural inputs

13,256 individuals received livestock

1,066 families received Agriculture training

95,480 people benefitted from income generation activities

58 producer groups formed

190 village savings and loan associations supported

### Disaster Risk Reduction & Response

Our programme focus on community-level Disaster Risk Reduction (DRR) and emergency response. We work with World Food Program (WFP) to respond to critical food needs in four townships. We are a country lead in the ASEAN Agreement on Disaster Management and Emergency Response Project and we have endorsed and promoted the ASEAN Committee on Disaster Management Civil Society Organizations Partnership Framework.

36,915 people reached with Non-food Items (NFIs), WASH, food and shelter including small scale emergency response

7,968 Internal Displace Persons (IDPs) were reached with rice, oil, salt and beans

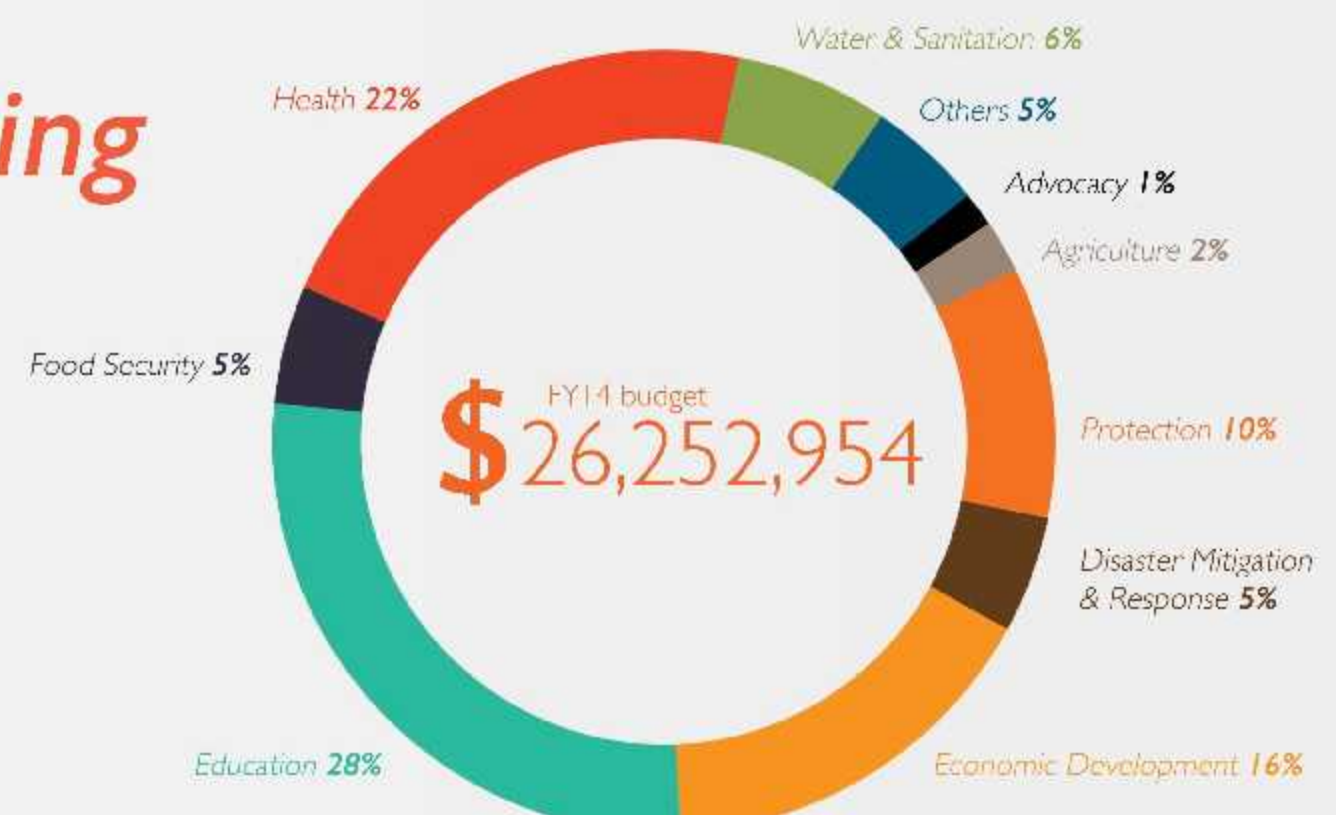

6,886 people in armed conflict area within Kachin state were assisted

13,432 primary school students benefitted from take home rations

787 community members involved disaster risk reduction related initiatives

300,000 total number of children impacted
